

**In The Claims:**

The following listing of claims replaces all previous listings.

Please amend claim 5 as follows.

1. (cancelled)

2. (cancelled)

3. (cancelled)

4. (cancelled)

5. (currently amended) A method of fabricating a restoration comprising:  
providing a framework possessing a coefficient of thermal expansion of as high as about  $18 \times 10^{-6}/^{\circ}\text{C}$ ;

fusing a dental porcelain composition comprising a leucite crystallite phase dispersed in a feldspathic glass matrix to said framework ~~thereby providing to provide a smooth, dental porcelain non-abrasive surface~~ thereon;

said fused dental porcelain composition having a maturing temperature in the range from about  $750^{\circ}$  to about  $1050^{\circ}\text{C}$ , a coefficient of thermal expansion (room temperature to  $450^{\circ}\text{C}$ ) of from about  $12 \times 10^{-6}/^{\circ}\text{C}$  to about  $17.5 \times 10^{-6}/^{\circ}\text{C}$ , and comprising:

Component	Amount (wt. %)
$\text{SiO}_2$	57-66
$\text{Al}_2\text{O}_3$	7-15
$\text{K}_2\text{O}$	7-15
$\text{Na}_2\text{O}$	7-12
$\text{Li}_2\text{O}$	0.5-3

and ~~further~~ comprising a dispersed leucite crystallite phase representing from about 5 to about 65 weight percent of the dental porcelain, and wherein the leucite crystallites possess diameters not exceeding about 10 microns; and

wherein the ~~dental porcelain is fired~~fusing occurs at a temperature ranging from about ~~790~~750° to about 850°C.

6. (cancelled)

7. (cancelled)

8. (previously presented) The method of Claim 5 wherein the leucite crystallites of the fused porcelain have diameters not exceeding about 5 microns.

9. (previously presented) The method of Claim 8 wherein the leucite crystallites have diameters not exceeding about 1 micron.

10. (previously presented) The method of Claim 5 wherein the dental porcelain has a maturing temperature of from about 800° to about 1000°C.

11. (previously presented) The method of Claim 5 wherein the porcelain is a two-phase porcelain.

12. (previously presented) The method of Claim 5 wherein the fused dental porcelain composition further comprises at least one of:

Component	Amount (wt. %)
CaO	0-3
MgO	0-7
F	0-4
CeO <sub>2</sub>	0-1
